

**INNOVATIVE.  
RESPONSIVE.  
PRODUCTIVE.**

# Conveyor Manufacturers Australia

# CAPABILITIES STATEMENT

*Conveyor Manufacturers Australia Pty Ltd (CMA) has a suit of innovative belt conveyor technologies. They are the **evolution** of increased **safety**, increased **productivity** and **cost** competitive surface and underground conveyors.*

M: +61 467 091 870 – Andrew Jolly

**Head Office & Demonstration Units:** 6 Shipley Drive, Rutherford, NSW 2320, Australia

**Corporate Office:** Level 34, Grosvenor Place Tower, 225 George Street, Sydney NSW 2000, Australia

## Experience & Qualifications:

- 100+ Years Working with Miners
- ISO9001:2015 Manufacturing
- 3<sup>rd</sup> Party Engineer Certifications
- International Patents

## What do we solve for?

We solve for your lost time, the one thing you can't get back. We eliminate ergonomic and other safety risks for your team. We create the first viable solution for easily reusable conveyor solutions. We create improved and measurable environmental outcomes throughout the project life-cycle.

## Who is our team?

Invented by industry veterans, the team has grown to incorporate Australian engineers, financial advisors, a board with 100+ years' experience in the mining industry and an on-the-ground delivery team with 50+ years' experience working in mines and delivering projects. We have strong partnerships with our manufacturing partners having worked closely for 15+ years with our Founders. Our teams' industry connections enable procurement focused on quality and cost competitiveness.

## What is our design process?

Every installation requires a detailed design and risk analysis that our team completes for your specific project. At a minimum, our products undergo FEA, 3<sup>rd</sup> Party Australian Engineering Certification, ISO9001:2015 Manufacturing, Dynamic Load Modelling, and a detailed Operational Risk Assessment.

Increased Safety

Increased Productivity

Decreased Waste

Decreased Downtime

Increased Ergonomics

Reduced Operational Cost

Reduced Maintenance

Reusable

**REDLINE™ is a dynamic underground conveyor which allows rapid belt moves and safe operations and maintenance.**

Truck Replacement

Relocatable

Reusable

Noise & Dust Containment

Customisable Design

Reduced Operational Cost

Safer to Install & Use

Quick Installation & Relocation

**CONTAINERVEYOR™ is a modular surface conveyor which combines the efficiency of conveying with the flexibility of trucking**

**INNOVATIVE.  
RESPONSIVE.  
PRODUCTIVE.**

**Conveyor  
Manufacturers  
Australia**

**CAPABILITIES  
STATEMENT**

*"REDLINE saves time. Time equals production. Production equals money. It's that simple. This system unlocks so much unused capacity in our existing equipment – boosting productivity, lowering costs, and improving safety. It is a no brainer."*

**Glen Britton** - Former Executive Head of Underground Operations, Anglo American

**REDLINE**

**Redline Product and Services**

- Supply Redline structural components (Redline Frames, Transport & Storage Wardrobes, Monorail, Drive Units)
- Redline benefit evaluation studies
- Design of Redline frames and installation to suit your site
- Collaborative Operational Risk Assessment planning
- Train your staff or contracting partner
- Source directly or work with your preferred partners to supply other conveyor parts (Boot-ends, belting, idlers, spares, LTU, Tension Pulleys...) when used with our system

**Redline Capabilities**

- Thin seam applications
- Narrow footprint
- Fixed or Mobile Boot End
- Belt Widths up to 2100mm
- Max Loading Capacity up to 5000 tph
- Slopes up to 30 degrees
- Flexible lengths

**Uses**

- Bord & Pillar
- Longwalls
- Drifts & Declines
- Tunnelling

*CONTAINERVEYOR = Lower Cost + Environmental Benefits + Increased Efficiency*

*CONTAINERVEYOR = Haul truck flexibility + Conveyor efficiency*

A step change in productivity, safety and ESG.

**Containerveyor Product and Services**

- Supply Containerveyor Modules
- Fixed conveyor frames pre-installed
- Containerveyor benefit evaluation studies
- Design of Containerveyor parameters and routes to suit your site
- Collaborative Operational Risk Assessment planning
- Train your staff or contracting partner
- Source or work with your preferred partners to supply other conveyor parts (Head-ends, belting, idlers, spares, Drives...) when used with our system

**Containerveyor Capabilities**

- Length up to 30 km
- Capacity from 1,000 to 15,000 tph
- Options for open or closed sides
- Options for walkways both sides
- Conveyor Belt widths up to 2500mm (primarily 1400mm)
- Limitless Add-Ons (Lighting, Piped services, Monitoring and communications, Dust extraction, Sound and temperature insulated, Custom paint/graphic finish, Elevated, Floating...)

**Uses**

- Bulk material haulage
- Truck replacement
- Moving pit locations
- Short term applications
- Sensitive environments
